

CAPABILITY STATEMENT

Overview

At Hiesler Contracting, we specialise in providing top-tier civil and environmental services, serving as a trusted partner for large organizations seeking excellence in earthmoving projects. Hiesler employ the latest machinery with UTS and GPS guidance systems to ensure all work is performed to the highest standards. With a steadfast commitment to quality, safety and environmental sustainability, we pride ourselves on delivering comprehensive solutions tailored to meet the unique needs of our clients.

Our mission at Hiesler Contracting is to be the premier provider of civil earthmoving services, exceeding client expectations through innovative solutions, exceptional execution and unwavering integrity. We aim to foster enduring partnerships built on trust, reliability and a shared commitment to zero harm in the workplace.

Expertise

With years of industry expertise and a team of skilled professionals, Hiesler Contracting possesses the knowledge, experience, and resources to tackle projects of any scale or complexity. From site preparation and land clearing to road remediation and formation, we have the capabilities to deliver results that align with our clients' objectives.

Key Services:

- **Earthmoving and Excavation:** Our specialized equipment and experienced operators enable us to efficiently handle bulk earthmoving and excavation tasks, ensuring precise and timely completion of projects.
- **Environmental Remediation:** We are committed to environmental stewardship. We provide environmentally responsible solutions for land remediation, erosion control and habitat restoration. Projects have included dams and causeway projects, cotton and irrigation fields as well as large scale head ditch drainage works.
- **Infrastructure Construction:** From roads and subgrade preparation to utilities and drainage systems, we have the expertise to undertake various infrastructure construction projects, delivering durable and reliable solutions.
- **Wet Hire Plant:** We can supply wet hire plant with experienced operators. Our growing fleet includes graders, water body trucks, semi water tankers and rollers. With strong relationships with our preferred plant hire partners we have the ability to source additional plant as required.

Key Projects

Adani Rail Corridor

Client Bravus Mining & Civil, BMD and Martinus	Principal Contractor Adani	Duration Mar 2021 – Jun 2022	Value \$250,000
---	--------------------------------------	--	---------------------------

Hiesler Contracting was responsible for an allocated section of the rail corridor. This scope of works included grader wet hire, ordering materials and the responsibility for all conformance of those sections to a final trim standard -0mm +15mm. Once the section had been final trimmed we constructed the rail service access tracks and maintained these tracks throughout the fibre optic project allocated to us with a later budget.

Storage Cell Ponds

Client We-Kando	Principal Contractor Suffcon	Duration Feb 2022 – Sep 2022	Value \$300,000
---------------------------	--	--	---------------------------

On this project, Hiesler Contracting was engaged as the final trim grader hire company. Our scope of work consisted of supervision and direction of plant in the field (including scrapers, dozers, roller and trucks) as well as control of moisture and compaction schedules. The aim for this project was to build a storage dam with high permeable materials as per testing. Once materials were mixed, the scrapers would run this material

to the graders' work zones to achieve a 300mm lift before testing. This process was repeated until the desired height was achieved. At completion, Hiesler Contracting conducted the final trim for all floors to a conformed tolerance of -5mm + 10mm and ensure finish was to the highest standard possible. Once this was achieved, the ponds were then lined with a 1.5mm HDPE poly liner. This job was completed to a high standard and we still complete regular works for this Principal Contractor to date.

Bulk Earthworks – Lease Pad Construction

Client APA	Principal Contractor Suffcon	Duration Apr 2023 – Sep 2023	Value \$150,000
----------------------	--	--	---------------------------

This project was a large-scale bulk earthworks job in which multiple pads were constructed under conformance and tight tolerances, 0mm + 20mm. Each pad was built with layered testing. Once all pads were constructed to height, they were capped with imported 2.1 gravels and final trimmed. This project is currently in progress with additional scope of works being issued.

Toowoomba Regional Council Flood Recovery Project (North)

Client Toowoomba Council	Principal Contractor Regional Georgiou	Duration In Progress	Value \$4 million
---------------------------------------	---	--------------------------------	-----------------------------

Hiesler Contracting was engaged by Georgiou Group to complete road restoration works across the Toowoomba Regional Council. The first stage of works commenced in the Oakey area before moving north to Yarraman and surrounds.

This project is part of the Toowoomba Regional Council 2022 Flood Recovery Program jointly funded by the Commonwealth-State Disaster Recovery Funding Arrangements (DRFA). The scope of works included

gravel road re-sheeting and formation grading, repair of scour damage to road formation and table drains. Hiesler supplied supervision and 3 work crews achieving an average production rate of 1.2km per day.

Wet Hire Plant

We can supply wet hire plant with experienced operators. Our growing fleet includes graders, water body trucks, semi water tankers and rollers. With strong relationships with our preferred plant hire partners we have the ability to source additional plant as required.

Company Structure

Hiesler Contracting Pty Ltd was established in 2021 to deliver wet hire of graders. Since then the company has grown to 3 fully operational civil earthworks crews with strong capabilities to deliver road remediation and environmental projects. The company Director, Brock Hiesler, has over 15 years of industry experience and attracts a workforce of suitably qualified project managers, supervisors and operators with many years of combined experience.

Clients

At Hiesler Contracting, we understand the importance of collaboration and communication in achieving project success. We work closely with our clients throughout every phase of the project, from planning and design to execution and completion, ensuring that their vision is realised efficiently and effectively. Some of our project partners include:

- Martinus Rail Civil Division
- BMD Constructions
- FKG Group
- Aurum Contracting
- Suffcon
- Bravus (Adani)
- Donald Burnett (Mt Douglas Station)
- Accelerate Group
- Santos
- RBY Projects APA (Mt Isa)
- MPC Kinetic
- Georgiou Group
